Know Thyself

by Anurag Rishi — Meditation & Spiritual Audio App
Application Functionality Overview

Know Thyself is a cross-platform (iOS & Android) meditation and spiritual-growth application offering guided audio meditations, talks, structured courses and live sessions. It is backed by a secure cloud database, a payment system, push notifications and a full web-based admin dashboard for managing all content and members. This document summarises what the app does for the end user.

1. Accounts & Membership

- **Sign up / sign in** with email & password, Google, or Sign in with Apple.
- **One account, one device** — each account is locked to a single active device to protect membership content; resetting the device is supported from within the app.
- **Membership access** — premium content unlocks for members with active access. Payments are handled securely (Razorpay) outside the store where required by platform rules.
- **Account management** — profile, membership and account deletion are available in-app.

2. Audio Library (the heart of the app)

GUIDED MEDITATIONS

Stream & listen

High-quality guided meditations and talks, organised by category, with cover artwork, artist and description.

OFFLINE

Download to listen offline

Members can download audio for offline playback. Downloads are encrypted, resume after a dropped connection, and survive app restarts.

BACKGROUND PLAY

Full player controls

Background playback with lock-screen artwork, play/pause, skip and seek — audio keeps playing when the screen is off.

CONTINUE

Resume where you left off

A "continue" card brings the user straight back to the track or lesson they were last playing.

3. Courses (structured programs)

- Multi-module **courses** made of **video** and **text** lessons, with progress tracking and a completion percentage.
- Videos are delivered via **Bunny Stream** (adaptive streaming, protected playback).
- **Certificates** and quizzes are supported for course completion.
- Locked courses clearly show a membership state; members unlock automatically on sign-in.

4. Live Sessions & YouTube

- **Live sessions** — scheduled sessions members can join, including paid live sessions.
- **Watch / YouTube** — curated video content, with thumbnails fetched automatically.

5. Notifications & Reminders

- **Push notifications** (Firebase) for new content, reminders and announcements.
- "Start your day" reminders deep-link straight into the relevant meditation.

6. Help & Support (in-app)

- A built-in **Help & Support** centre: browse answers, report a problem, send feedback, and raise a support ticket.
- Support tickets are a two-way conversation — the team replies from the admin dashboard and the user sees it in-app.

7. Platform Compliance

- Built to meet **Apple App Store** and **Google Play** policies, including the reader-app guidelines and Apple's External Link Account entitlement.
- Public legal pages (privacy, terms, refunds, account deletion) are live and reachable.

Live on both stores:

Google Play — play.google.com/store/apps/details?id=com.knowthyself.app

Apple App Store — apps.apple.com/in/app/know-thyself-by-anurag-rishi/id6786403340
